ENERGY POLICY

Index to Volume 31

January, February, March, April, May, June, July, August, September, October, November, December

Articles–Titles

Alternative energy

Promotional issues on alternative energy technologies in Nepal *S Pokharel* 31:307–318

A strategy for introducing hydrogen into transportation *A E Farrell, D W Keith and J J Corbett* 31:1357–1367

Carbon trading

Carbon quota price and CDM potentials after Marrakesh *W Chen* 31:709–719

Equity and carbon emissions trading: a model analysis *M Leimbach* 31:1033–1044

Green certificates and carbon trading in the Netherlands *M Boots* 31:43–50

Climate change

Energy policy and climate change *P Jean-Baptiste and R Ducroux* 31:155–166

Making the link: climate policy and the reform of the UK construction industry *S Sorrell* 31:865–878

UK's climate change levy: cost effectiveness, competitiveness and environmental impacts *A Varma* 31:51–61

Coal

Optimal use of coal for power generation in India *R Mathur, S Chand and T Tezuka* 31:319–331

Cogeneration

Modelling the adoption of industrial cogeneration in Japan using manufacturing plant survey data *D Bonilla, A Akisawa and T Kashiwagi* 31:895–910

Potential of gas turbine co-generation in China *Y Handong, L Yuhong and Y Dajun* 31:931–936

Cost-benefit analysis

The impact of possible climate catastrophes on global warming policy *A Baranzini, M Chesney and J Morisset* 31:691–701

Eco-labeling

Eco-labeling for energy efficiency and sustainability: a meta-evaluation of US programs *A Banerjee and B D Solomon* 31:109–123

Electricity

An assessment of South African prepaid electricity experiment, lessons learned, and their policy implications for developing countries *D D Tewari and T Shah* 31:911–927

Can negotiated agreements replace efficiency standards as an instrument for transforming the electrical appliance market? *P Menanteau* 31:827–835

Carbon emission and mitigation cost comparisons between fossil fuel, nuclear and renewable energy resources for electricity generation *R E H Sims, H-H Rogner and K Gregory* 31:1315–1326

Co-existence of electricity, TEP, and TGC markets in the Baltic Sea Region *M Hindsberger, M H Nybroe, H F Ravn and R Schmidt* 31:85–96

Diffusion of green power products in Switzerland *R Wüstenhagen, J Markard and B Truffer* 31:621–632

Disclosure of electricity products – lessons from consumer research as guidance for energy policy *J Markard and E Holt* 31:1459–1474

Eco-labeling for energy efficiency and sustainability: a meta-evaluation of US programs *A Banerjee and B D Solomon* 31:109–123

Economic assessment of combined cycle gas turbines in Australia. Some effects of microeconomic reform and technological change *B Naughten* 31:225–245

Electric infrastructure failures in Nigeria: a survey-based analysis of the costs and adjustment responses *A F Adenikinju* 31:1519–1530

Electricity and externalities in South Africa *R Spalding-Fecher and D K Matibe* 31:721–734

Electricity market reform failures: UK, Norway, Alberta and California *C-K Woo, D Lloyd and A Tishler* 31:1103–1115

Electricity use in California: past trends and present usage patterns *R E Brown and J G Koomey* 31:849–864

Energy subsidies in California's electricity market deregulation *A Ritschel and G P Smestad* 31:1379–1391

Environmental labelling of electricity delivery contracts in Sweden *T Kåberger* 31:633–640

A green certificate market combined with liberalised power market *P E Morthorst* 31:1393–1402

Green certificate trading in the Netherlands in the prospect of the European electricity market *V Dinica and M J Arentsen* 31:609–620

Green paper with green electricity? Greening strategies of Nordic pulp and paper industry *J Luukkanen* 31:641–655

Greening of electricity in Europe: challenges and developments *A Midttun and A L Koefoed* 31:677–687

How to design greenhouse gas trading in the EU *G T Svendsen and M Vesterdal* 31:1531–1539

International benchmarking and regulation: an application to European electricity distribution utilities *T Jamash and M Pollitt* 31:1609–1622

Investigation of greenhouse gas reduction potential and change in technological selection in Indian power sector *J Mathur, N K Bansal and H-J Wagner* 31:1235–1244

The Italian Green Certificates market between uncertainty and opportunities *A Lorenzoni* 31:33–42

Market transformation of energy-efficient motor technologies in the EU *A T de Almeida, P Fonseca, H Falkner and P Bertoldi* 31:563–575

Modelling the adoption of industrial cogeneration in Japan using manufacturing plant survey data *D Bonilla, A Akisawa and T Kashiwagi* 31:895–910

A multi-channel stakeholder consultation process for transmission deregulation *R Gregory, B Fischhoff, S Thorne and G Butte* 31:1291–1299

The multidimensionality of electricity reform – an Australian perspective *D Sharma* 31:1093–1102

National environment targets and international emission reduction instrument *P E Morthorst* 31:73–83

Optimizing the level of renewable electric R&D expenditures using real options analysis *G A Davis and B Owens* 31:1589–1608

Principal players in utility restructuring: the case of Orissa *R A Thillai* 31:431–441

Project financing consequences on cogeneration: industrial plant and municipal utility co-operation in Sweden *G Sundberg and J Sjödin* 31:491–503

Scenario planning for electricity supply *W Soontornrangson, D G Evans, R J Fuller and D F Stewart* 31:1647–1659

Simultaneous attainment of energy goals by means of green certificates and emission permits *S G Jensen and K Skytte* 31:63–71

Emissions trading

Co-existence of electricity, TEP, and TGC markets in the Baltic Sea Region *M Hindsberger, M H Nybroe, H F Ravn and R Schmidt* 31:85–96

Emissions trading in transition economies: the link between international and domestic policy *M Evans* 31:879–886

Equity and carbon emissions trading: a model analysis *M Leimbach* 31:1033–1044

Marketable emission permits with imperfect monitoring *R San Martin* 31:1369–1378

Simultaneous attainment of energy goals by means of green certificates and emission permits *S G Jensen and K Skytte* 31:63–71

Energy

Analytical search of problems and prospects of power sector through Delphi study: case study of Kerala State, India *P D Sharma, P S C Nair and R Balasubramanian* 31: 1245–1255

Deregulation and growth in China's energy sector: a review of recent development *Y Wu* 31:1417–1425

Energy consumption with sustainable development in developing country: a case in Jiangsu, China *X Wang and Z Feng* 31:1679–1684

Does energy integrate? *A Hira and L Amaya* 31:185–199

The direct and indirect energy requirement of households in the European Union *A H M E Reinders, K Vringer and K Blok* 31:139–153

An econometric study on China's economy, energy and environment to the year 2030 *L ZhiDong* 31:1137–1150

Energy and emission scenarios for China in the 21st century – exploration of baseline development and mitigation options *D van Vuuren, Z Fengqi, B de Vries, J Kejun, C Graveland and L Yun* 31:369–387

Energy systems and the climate dilemma. Reflecting the impact on CO_2 emissions by reconstructing regional energy systems *A Carlson* 31:951–959

The energy transition in action: urban domestic fuel choices in a changing Zimbabwe *B M Campbell, S J Vermeulen, J J Mangono and R Mabuga* 31:553–562

External costs and taxes in heat supply systems *A Karlsson and L Gustavsson* 31:1541–1560

Global energy scenarios meeting stringent CO_2 constraints – cost-effectiveness fuel choices in the transportation sector *C Azar, K Lindgren and B A Andersson* 31:961–976

Impact of energy subsidies on energy consumption and supply in Zimbabwe. Do the urban poor really benefit? *I Dube* 31:1635–1645

International greenhouse gas trading programs: a discussion of measurement and accounting issues *E Vine, G Kats, J Sathaye and H Joshi* 31:211–224

"Key" sectors in final energy consumption: an input-output application to the Spanish case *V Alcántara and E Padilla* 31:1673–1678

Management structure and technology diffusion in Chinese state-owned enterprises *K Fisher-Vanden* 31:247–257

Regional cooperation and energy development in the Greater Mekong Sub-region *X Yu* 31:1221–1234

A theoretical analysis of price elasticity of energy demand in multi-stage energy conversion systems *R Lowe* 31:1699–1704

Three types of decline in energy intensity – an explanation for the decline of energy intensity in some developing countries *J W Sun* 31:519–526

Tradable Green Certificates in selected European countries – overview and assessment *L Nielsen and T Jeppesen* 31:3–14

Transport and energy demand in Mexico: the personal income shock *M Bauer, E Mar and A Elizalde* 31:1475–1480

Weatherizing the homes of low-income home energy assistance program clients: a programmatic assessment *B Tonn, R Schmoyer and S Wagner* 31:735–744

Energy efficiency

Can negotiated agreements replace efficiency standards as an instrument for transforming the electrical appliance market? *P Menanteau* 31:827–835

Consumer demand for 'green power' and energy efficiency *J Zarnikau* 31:1661–1672

Demand Side Management in a competitive European market: Who should be responsible for its implementation *M H Didden and W D D'haeseleer* 31:1307–1314

Disseminating energy-efficient technologies: a case study of compact fluorescent lamps (CFLs) in India *A Kumar, S K Jain and N K Bansal* 31:259–272

Efficiency, performance and regulation of the international gas industry – a bootstrap DEA approach *D Hawdon* 31: 1167–1178

Governments should implement energy-efficiency standards and labels – cautiously *S Wiel and J E McMahon* 31:1403–1415

Industrial energy efficiency: the need for investment decision support from a manager perspective *P Sandberg and M Söderström* 31:1623–1634

The insurance and risk management industries: new players in the delivery of energy-efficient and renewable energy products and services *E Mills* 31:1257–1272

Long-term outlook of energy use and CO_2 emissions from transport in Central and Eastern Europe *T Zachariadis and N Kouvaritakis* 31:759–773

Making the link: climate policy and the reform of the UK construction industry *S Sorrell* 31:865–878

Market transformation of energy-efficient motor technologies in the EU *A T de Almeida, P Fonseca, H Falkner and P Bertoldi* 31: 563–575

New horizons for Korean energy industry – shifting paradigms and challenges ahead *H-J Chang* 31:1073–1084

Overcoming the energy efficiency gap in India's household sector *B S Reddy* 31:1117–1127

Policy options to promote energy efficient and environmentally sound technologies in small- and medium-scale industries *M Thiruchelvam, S Kumar and C Visvanathan* 31:977–987

Public policy analysis of energy efficiency and load management in changing electricity business *E Vine, J Hamrin, N Eyre, D Crossley, M Maloney and G Watt* 31: 405–430

Risk transfer via energy-savings insurance *E Mills* 31:273–281

Stimulating R&D of industrial energy-efficient technology: the effect of government intervention on the development of strip casting technology *E E M Luiten and K Blok* 31:1339–1356

Energy market

Competition in the market for space heating. District heating as the infrastructure for competition among fuels and technologies *P E Grohnheit and B O G Mortensen* 31: 817–826

Energy subsidies in California's electricity market deregulation *A Ritschel and G P Smestad* 31:1379–1391

Energy policy

An assessment of South African prepaid electricity experiment, lessons learned, and their policy implications for developing countries *D D Tewari and T Shah* 31:911–927

A comparison of discounted cashflow and modern asset pricing methods – project selection and policy implications *M Emhjellen and C M Alaouze* 31:1213–1220

Disclosure of electricity products – lessons from consumer research as guidance for energy policy *J Markard and E Holt* 31:1459–1474

Dynamic formulation of a top-down and bottom-up merging energy policy model *C W Frei, P-A Haldi and G Sarlos* 31: 1017–1031

Emissions trading in transition economies: the link between international and domestic policy *M Evans* 31:879–886

Energy analysis of Jordan's commercial sector *J O Jaber, M S Mohsen, A Al-Sarkhi and B Akash* 31:887–894

Energy policy and climate change *P Jean-Baptiste and R Ducroux* 31:155–166

How to design greenhouse gas trading in the EU *G T Svendsen and M Vesterdal* 31: 1531–1539

Implications of transportation policies on energy and environment in Kathmandu Valley, Nepal *S Dhakal* 31:1493–1507

A lifestyle-based scenario for US buildings: implications for energy use *R Diamond* 31:1205–1211

LIHEAP reconsidered *M J Kaiser and A G Pulsipher* 31:1441–1458

LPG: a secure, cleaner transport fuel? A policy recommendation for Europe *E Johnson* 31:1571–1577

National environment targets and international emission reduction instrument *P E Morthorst* 31:73–83

Oil supply and oil politics: Déjà Vu all over again *C J Cleveland and R K Kaufmann* 31:485–489

Policy options to promote energy efficient and environmentally sound technologies in small- and medium-scale industries *M Thiruchelvam, S Kumar and C Visvanathan* 31:977–987

Prices versus quantities: choosing policies for promoting the development of renewable energy *P Menanteau, D Finon and M-L Lamy* 31:799–812

Public policy analysis of energy efficiency and load management in changing electricity business *E Vine, J Hamrin, N Eyre, D Crossley, M Maloney and G Watt* 31: 405–430

Quest for Middle East oil: the US versus the Asia-Pacific region *M G Salameh* 31: 1085–1091

Role of nuclear fusion in future energy systems and the environment under future uncertainties *K Tokimatsu, J Fujino, S Konishi, Y Ogawa, K Yamaji* 31:775–797

Some challenges related to introducing tradable green certificates *P Fristrup* 31:15–19

Strategic choices: Swedish climate intervention policies and the forest industry's role in reducing CO_2 emissions *I Nyström and D W Cornland* 31:937–950

Take-or-Pay under Japanese energy policy *R Namikawa* 31:1327–1337

Energy taxes
UK's climate change levy: cost effectiveness, competitiveness and environmental impacts *A Varma* 31:51–61

Financial risk
Financial risks for green electricity investors and producers in a tradable green certificate market *J Lemming* 31:21–32

Forward contracts
Financial risks for green electricity investors and producers in a tradable green certificate market *J Lemming* 31:21–32

Fossil fuels
Carbon emission and mitigation cost comparisons between fossil fuel, nuclear and renewable energy resources for electricity generation *R E H Sims, H-H Rogner and K Gregory* 31:1315–1326
Financial subsidies to the Australian fossil fuel industry *C Riley and M Diesendorf* 31:125–137

Global warming
Energy systems and the climate dilemma. Reflecting the impact on CO_2 emissions by reconstructing regional energy systems *A Carlson* 31:951–959
The impact of possible climate catastrophes on global warming policy *A Baranzini, M Chesney and J Morisset* 31:691–701

Green power
Diffusion of green power products in Switzerland *R Wüstenhagen, J Markard and B Truffer* 31:621–632
Eco-labeling for energy efficiency and sustainability: a meta-evaluation of US programs *A Banerjee and B D Solomon* 31:109–123
Environmental labelling of electricity delivery contracts in Sweden *T Käberger* 31:633–640
Green certificate trading in the Netherlands in the prospect of the European electricity market *V Dinica and M J Arentsen* 31:609–620
Green paper with green electricity? Greening strategies of Nordic pulp and paper industry *J Luukkanen* 31:641–655
Greening of electricity in Europe: challenges and developments *A Midttun and A L Koefoed* 31:677–687

Greenhouse gases
Co-existence of electricity, TEP, and TGC markets in the Baltic Sea Region *M Hindsberger, M H Nybroe, H F Ravn and R Schmidt* 31:85–96
Empirical evidence in the analysis of the environmental and energy policies of a series of industrialised nations, during the period 1960–1997, using widely employed macroeconomic indicators *A Focacci* 31:333–352
Financial risks for green electricity investors and producers in a tradable green certificate market *J Lemming* 31:21–32
A green certificate market combined with liberalised power market *P E Morthorst* 31:1393–1402
Green certificates and carbon trading in the Netherlands *M Boots* 31:43–50
Green certificates and emission trading *P F Morthorst* 31:1–2
Greenhouse gas emissions trading in BP *M Akhurst, J Morgheim and R Lewis* 31:657–663
How to design greenhouse gas trading in the EU *G T Svendsen and M Vesterdal* 31:1531–1539
International greenhouse gas trading programs: a discussion of measurement and accounting issues *E Vine, G Kats, J Sathaye and H Joshi* 31:211–224
Investigation of greenhouse gas reduction potential and change in technological selection in Indian power sector *J Mathur, N K Bansal and H-J Wagner* 31:1235–1244
The Italian Green Certificates market between uncertainty and opportunities *A Lorenzoni* 31:33–42
"Key" sectors in final energy consumption: an input-output application to the Spanish case *V Alcántara and E Padilla* 31:1673–1678
National environment targets and international emission reduction instrument *P E Morthorst* 31:73–83
Simultaneous attainment of energy goals by means of green certificates and emission permits *S G Jensen and K Skytte* 31:63–71
Some challenges related to introducing tradable green certificates *P Fristrup* 31:15–19
Tradable Green Certificates in selected European countries – overview and assessment *L Nielsen and T Jeppesen* 31:3–14

Kyoto Protocol
Carbon quota price and CDM potentials after Marrakesh *W Chen* 31:709–719
The costs of the Kyoto Protocol in the European Union *L L Viguier, M H Babiker and J M Reilly* 31:459–481
Defining Investment Additionality for CDM projects – practical approaches *S Greiner and A Michaelowa* 31:1007–1015
Demand Side Management in a competitive European market: Who should be responsible for its implementation *M H Didden and W D D'haeseleer* 31:1307–1314
How to design greenhouse gas trading in the EU *G T Svendsen and M Vesterdal* 31:1531–1539

Nuclear power
Carbon emission and mitigation cost comparisons between fossil fuel, nuclear and renewable energy resources for electricity generation *R E H Sims, H-H Rogner and K Gregory* 31:1315–1326
The issue of the fourth nuclear power plant and its impact on 3-E problems in Taiwan – empirical evidence from the energy forecasting (EnFore) system *Y J Bor and F-Y Chou* 31:1129–1136
Quest for Middle East oil: the US versus the Asia-Pacific region *M G Salameh* 31:1085–1091

Oil
The linkage between oil price shocks and economic growth with inflation in the presence of technological advances: a CGE model *K Doroodian and R Boyd* 31:989–1006
Is Russia a viable oil source for Japan? *J Phillips and J Challacombe* 31:837–847
Oil price fluctuations and Singapore economy *Y Chang and J F Wong* 31:1151–1165

Petroleum installations
Decommissioning of petroleum installations – major policy issues *P Osmundsen and R Tveterås* 31:1579–1588

Photovoltaics
Dissemination of solar photovoltaics: a study on the government programme to promote solar lantern in India *S K Velayudhan* 31:1509–1518
Status of photovoltaic industry in China *Yang H, Wang H, Yu H, Xi J, Cui R and Chen C* 31:703–707

Power sector
Liberalisation of the Russian power sector *D Kennedy* 31:745–758
Power sector reform in developing countries: mismatched agendas *N Wamukonya* 31:1273–1289

Refrigeration and air conditioning
Evaluation of refrigerating and air-conditioning technologies in heat cascading systems under the carbon dioxide emissions constraint: the proposal of the energy cascade balance table *Y Shimazaki* 31:1685–1697

Regulation
Deregulation and growth in China's energy sector: a review of recent development *Y Wu* 31:1417–1425
Energy subsidies in California's electricity market deregulation *A Ritschel and G P Smestad* 31:1379–1391
International benchmarking and regulation: an application to European electricity distribution utilities *T Jamasb and M Pollitt* 31:1609–1622
A multi-channel stakeholder consultation process for transmission deregulation *R Gregory, B Fischhoff, S Thorne and G Butte* 31:1291–1299
The need for regulation of gas storage: the case of France *B Esnault* 31:167–174
Regulation in developing countries is different: avoiding negotiation, renegotiation and frustration *M Bell* 31:299–305
Simultaneous attainment of energy goals by means of green certificates and emission permits *S G Jensen and K Skytte* 31:63–71
Supporting renewable energy on liberalised markets: green electricity between additionality and consumer sovereignty *R Menges* 31:583–596

Renewable energy
A critical assessment of renewable energy usage in the USA *D L Klass* 31:353–367
Avoiding perverse effects of baseline and investment additionality determination in the case of renewable energy projects *S Bode and A Michaelowa* 31:505–517
Brazilian waste potential: energy, environmental, social and economic benefits *L B Oliveira and L P Rosa* 31:1481–1491
Carbon emission and mitigation cost comparisons between fossil fuel, nuclear and renewable energy resources for electricity generation *R E H Sims, H-H Rogner and K Gregory* 31:1315–1326
Consumer demand for 'green power' and energy efficiency *J Zarnikau* 31:1661–1672

Danish energy reform: policy implications for renewables *N I Meyer and A L Koefoed* 31:597–607
Environmental and economic effects of renewable energy sources use on a local case study *C Cosmi, M Macchiato, L Mangiamele, G Marmo, Pietrapertosa and M Salvia* 31: 443–457
European schemes for promoting renewables in liberalised markets *N I Meyer* 31:665–676
A green certificate market combined with liberalised power market *P E Morthorst* 31:1393–1402
Green certificate trading in the Netherlands in the prospect of the European electricity market *V Dinica and M J Arentsen* 31: 609–620
Greener energy solutions for a sustainable future: issues and challenges for Malaysia *M Z Jaafar, W H Kheng and N Kamaruddin* 31:1061–1072
The insurance and risk management industries: new players in the delivery of energy-efficient and renewable energy products and services *E Mills* 31:1257–1272
The Italian Green Certificates market between uncertainty and opportunities *A Lorenzoni* 31:33–42
Optimizing the level of renewable electric R&D expenditures using real options analysis *G A Davis and B Owens* 31:1589–1608
Prices versus quantities: choosing policies for promoting the development of renewable energy *P Menanteau, D Finon and M-L Lamy* 31:799–812
The renewables portfolio standard in Texas: an early assessment *O Langniss and R Wiser* 31:527–535
Simultaneous attainment of energy goals by means of green certificates and emission permits *S G Jensen and K Skytte* 31:63–71
Some challenges related to introducing tradable green certificates *P Fristrup* 31:15–19
Supporting renewable energy on liberalised markets: green electricity between additionality and consumer sovereignty *R Menges* 31:583–596
Tradable Green Certificates in selected European countries – overview and assessment *L Nielsen and T Jeppesen* 31:3–14

Rural energy

China's rural electrification and poverty reduction *M Yang* 31:283–295

Solar energy

Barriers and opportunities in realising sustainable energy concepts – an analysis of two Swiss case studies *C Pohl and P Gisler* 31:175–183
Dissemination of solar photovoltaics: a study on the government programme to promote solar lantern in India *S K Velayudhan* 31:1509–1518

Sustainable energy

Barriers and opportunities in realising sustainable energy concepts – an analysis of two Swiss case studies *C Pohl and P Gisler* 31:175–183
Dynamic formulation of a top-down and bottom-up merging energy policy model *C W Frei, P-A Haldi and G Sarlos* 31: 1017–1031
Energy consumption with sustainable development in developing country: a case in Jiangsu, China *X Wang and Z Feng* 31:1679–1684
Globalization of the automobile industry in China: dynamics and barriers in greening of the road transportation *L Gan* 31:537–551
Sustainable energy development: a challenge for Asia and the Pacific region in the 21st century *P C Saha* 31:1051–1059

Technology

Future implications of China's energy-technology choices *E D Larson, W Zongxin, P DeLaquil, C Wenying and G Pengfei* 31:1189–1204

Tradable permits

National environment targets and international emission reduction instrument *P E Morthorst* 31:73–83

Transportation

Global energy scenarios meeting stringent CO_2 constraints – cost-effectiveness fuel choices in the transportation sector *C Azar, K Lindgren and B A Andersson* 31:961–976
Implications of transportation policies on energy and environment in Kathmandu Valley, Nepal *S Dhakal* 31:1493–1507
LPG: a secure, cleaner transport fuel? A policy recommendation for Europe *E Johnson* 31:1571–1577
A strategy for introducing hydrogen into transportation *A E Farrell, D W Keith and J J Corbett* 31:1357–1367
Transport and energy demand in Mexico: the personal income shock *M Bauer, E Mar and A Elizalde* 31:1475–1480

Wind power

Danish energy reform: policy implications for renewables *N I Meyer and A L Koefoed* 31:597–607
